۳	Many countries have used the energy in moving water for thousands of years. And today, it's still a powerful resource that can generate clean, renewable, and cheap electricity. They produce energy	
'	from running water and convert it to electricity. The power that is produced as a result of falling or	
	running water is called "hydroelectric power" or "hydropower". Turbines and generators convert this power into electricity.	
	Today, about 19% of all our electricity is generated from hydropower, making it one of the largest	
	sources of renewable power. So what makes hydropower renewable? It's simple: water. Water is	
	converted into clouds and recycles back to earth as rain. This process is called "The Water Cycle". The water cycle is continuously recharging and can be used to produce electricity along the way.	
	True/False	
	36. According to the passage, the energy in moving water can generate clean, renewable, and cheap	
	electricity. a)True b) False

Last night Mike left work late at around 9 p.m. Most people had already gone home before he came out of the office. The street was very dark and quiet. He hadn't experienced such a thing before. While he was walking, a car pulled over. He looked at the driver. He was sure he had seen this man before. He wondered who he could be. The driver waved at him and came out of the car. He asked Mike if he could drive him home. Suddenly Mike remembered he was one of his clients. His name was John. John had come to his office two or three times, before. The last time he was in the office, he was so upset. He was worried because he had lost his documents. Everyone in the office tried to help him. They started to look for his suitease. Finally, he remembered that he had left his suitease in his car! He apologized for his anger and left. Choose the best answer. 41. According to the passage, Mike hadn't		37. A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'dictio' ('saying'). There are several types of dictionaries. Dictionaries which explain words and how they are used; dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words. Dictionaries which explain what words mean give a clear 'definition' of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose. There are also dictionaries which translate words into other languages. When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning. True/False 45. Since dictionaries put words in alphabetical order, you can find them easily. a)True b) False 46.
